 - **Y,U**
20. January is to December as Sunday is to ?
 - **SATURDAY**

21. A helicopter rises up to 15 km. then travel 10 km, towards north at the time of landing does it need some direction if yes ,which one?

- **South**

22. Cause is to effect as disease is to?

- **Death**

23. Pointing to a girl a woman said"her mother is the only daughter of my mother "what is the girl to woman?

- **Daughter**

25. Dawn is to dusk as morning is to?

- **Evening**

26. Iqbal 's father is the brother of your sister what relation Iqbal has with you?

- **Nephew**

27. What will come next: $3=3$ $3=9$ $3=15$ $3=$?

- **$3=21$**

28. Complete the words: L—n—h ? (meals)

- **U ,C**

29. Answer the following in yes or no : Washington is the capital of USA?

- **Yes**

30. What will come next : $6=0$ $7=7$ $8=16$ $9=$?

- **$9=27$**

ISSB Intelligence Test 14 For Pak Army PAF Navy Joining

1. If 10 years are added to $\frac{3}{5}$ of Abid he will be 4 years younger to the present age of his elder brother who will be 25 years What is the present of Abid ?
 - **18.33 years**
2. The combined length of two rivers a and b is 1000 kilometer if the river a is 200 km shorter than the river b find the individual length of each river?
 - **600 km**
3. What will come next: 4 16 36 ____?
 - **64**
4. the cost of one car or four bicycles is rs.180,000 Akram wants to purchase one car and one bicycle and also willing to pay rs.90,000 as down payment. what will be the credit for Akram?
 - **Rs. 135000**
5. If a price of rope 20 ft. long is cut into 2 pieces so that one is $\frac{2}{3}$ as long as the other how long will that longer piece be?
 - **13.33**
6. If 5 boxes of soap weight 75 kilos and box when empty weight 3 kilo how much is the weight of soap?
 - **60k.g**
7. A shoes maker industry produces 1200 pairs of shoes in one month ,having 40 workers if it receives an order of 1800 pairs in one month how many workers should it want to employ more ?
 - **20 Workers**
8. A tribe consisted of a man his five wives his seven daughters his six sons and their wives each son had two children How many members were there in the whole tribe?
 - **37**
9. Khalid is now four times as old as this daughter , ten year ago ,if the sum of their ages was sixty. find the present age of daughter?
 - **16years**
10. A city is 100 km away from B city . if A bus radius of two feet of its Tyre and it reaches to city B from A after completing 1000 revolutions of its Tyre then a car having radius of one foot of its Tyre will complete the distance in_ revolution of its Tyre?
 - **2000**
11. Ono person can complete a piece of work in eight day while the other can complete the same work in four days(if both work 10 hours per day)How many hours are required to complete the same work if both person do the same combined?
 - **26 Hours , 40 Mint**
12. A figure comprises of four digits first and second digit are same while third is zero and fourth is square of the first digits is 15 them what is the figure ?
 - **3309**
13. Zahoor is 5 cm taller than Nasir , while Akram is 3 cm taller than Zahoor . if Nasim is 2 cm shorter than Nasir and having a height of 5 feet . what is the height of Akram?
 - **5feet – 10cm**
14. Add the number which come in the middle of the series to the largest number and divide the total by the smallest number: 28 5 18 6 7__?

- 7

15. If a train is running 4 minutes late and losing 4 seconds per minute how many more minutes will it take for the train to run half an hour late?

- **369 Mint Running Fast**

16. A father's age is twice his son's age ten years ago he was thrice as his son find their present ages?

- **Son age 20 years**

- **Father age 40 years**

17. Complete the words: D—nk— y? (Animal)

- **O, E**

18. If pencils sell at 4 for 60 paisas how much will 2 1/2 dozen cost ?

- **4.50 Paisa**

19. In a tank there is 100 liters of water before starting the taps. if each tap fills 25 liters per hour and 5 taps continue to fill 4 hours and 4 taps for only 15 minutes each .during this filling 125 liters are consumed. what is the position of water in tank now?

- **500 Liters**

20. One basket of oranges has one third again as many oranges as a second basket if the first basket has 3 more oranges as a second basket, how many has the first basket?

- **12 Orange**

21. If 5 is subtracted from 30 what will be the square root of remaining?

- **5**

22. In a cricket_tennis ball tournament based on knock out system the winner of final match won six matches in whole tournament .How many teams took part in the tournament ?

- **64 Teams**

23. In a group of 50 players 30% play hockey 80% play cricket Are there any who play both hockey and cricket?

- **Yes**

24. There is a two digit figure in which one digit is exactly half the other. if the position of both digits is interchanged ,the resultant figure when added with the original figure sum to 99 . what is the original ?

- **36**

25. There are eight balls arranged in such a way that one is the center while other from a circle around the first How many lines have to draw in order to join each ball with both adjacent balls and also with the central ball? no line can intersect the other line also?

- **14**

26. A swimmer can swim a distance of 36 kilometers in the direction of water current in the same time ,which he requires to swim 36 kilometers in the opposite direction of water current in stream if in still water swimmer has speed of 12 kilometers per hour more than the speed of that of water in stream then what is the speed of water?

- **3 km/h**

27. Two trains are traveling in opposite directions one of these is 500 meters long having a speed of 120 km/h while other is 100 meters long having a speed of 60 km/h in what time do these cross each other ?

- **30 Seconds**

28. A watch lost two minutes per hour if on Monday 9 A.M the watch was exactly showing 9 A.M then what is the time on watch on Wednesday 9 A.M ?

• **7 A.M**

29. There is a wooden block of two feet wide and three feet long. a carpenter required one minute to cut one right foot. how much time will be required to cut the block in equal blocks of one square feet ?

• **7 Minutes**

30. If a boy is 24 year younger than his father and after two year the sum of their will be 40. How old is the father?

• **30 Years**

ISSB Intelligence Test 15 For Pak Army PAF Navy Joining

1. What profit percent is made by selling an article at a certain price if by selling it at half of that price there would be a loss of 15% ?
 - **70%**
2. Find the cost of white washing a room 40 feet long 30 feet wide and 20 feet high at rate of 50 paisas per square foot?
 - **Rs.2000**
3. What sum of money invested at 12% simple interest will secure the same income as rs .25,000 can secure at 18% ?(simple interest):
 - **37,000**
4. A sells an to article to 'b' at a profit of 20% 'b' sells the same to 'c' at the profit of 10% if C pays rs,6600 What did it cost to A?
 - **5000**
5. The costs of a pair of pants and shoes total Rs. 175/if the shoes cost Rs.25/more Than the pants ,what is the cost of pants?
 - **Rs.75**
6. A man walks a certain distance and rides back in three hours 45 mint. He could ride both ways in 21/ 2 hours. How long would he take to walk both ways?
 - **5 Hours**
7. In first wage plan ,one worker gets , 1000 rupees for a month doing 20 hours only , the management offered another plan to all its workers that normal rate of rupees 50 is to be given on 15 hours and then 20% extra commission is to be given on every extra hour of work done .if the same worker does the same work done if the same worker does the same work in 20 hours. what will he earn in the second wage plan ?
 - **Rs1050**
8. There are 29 teams in a cricket tournament. the main condition of contest is “knock _out” How many match will take place in the whole tournament?
 - **28 Matches**
9. There are three departments A, B and C department B produces two units from one unit of “A” while C produces two units from one of “B” A &B department sold half of their product to next department and half to outsiders then what is the total production of A department?
 - **24,000 Units**
10. The cost price of 25 articles is equal to the selling price of 20 articles Find the price percent?
 - **25%**
11. An arithmetic figure is comprising of two fonts. if we add both and square the digits and add 9 to it, the final figure is the same if we interchange the position of original figure What is the final figure? i.c Refix the final figure?
 - **90**
12. A man went to market with 24 taperecorders and rs.4000 in his pocket he sold 24 taperecorders and bought 4 televisions at rs.14,000 each .he then hand rs.8,000 .what sum did he get each taperecorder?
 - **2500**
13. A watch lost one minute 18 seconds in 39 days. How many seconds did it lose per day?

- **2 Seconds**

14. A man bought 200 books .he sold 80 of them at a profit 15% and the remaining at a profit of 50% he realized rs.27200 in total .what was his cost of books?

- **20,000**

15. A man employed a peon on the conditions that he would get rs.3000 and a watch after a month but after ten days he dismissed him and giving him only the watch, Find the value of watch?

- **Rs.1500**

16. The circumference of the fore wheel and hindwheel of a carriage are 10 feet and 12 feet respectively After how much distance will the former make 100 revolutions more than the latter?

- **2000 Yards**

17. Is it possible and if then what is the number?

- **2**

18. Two trains are moving in opposite directions at a speed of 50 and 70 km/hr Their lengths are 150m and 100m. the time required for their crossing each other is ?

- **7.5 Seconds**

19. Book shop sells its books to its customers on 40% discount if one third books are sold on 33% discount and the total cash received is rs.6222 then what was the original price of all books.?

- **Rs.100,00**

20. Mr, Aslam is a chief accountant in a textile mills he spends one third of his salary on personal affairs, then gives half of remaining amount for the household purpose and finally he invested 75% of final remaining amount for emergency .if he has 1000 in hand now , what is his total salary ?

- **12,000**

21. The average age of a class of 50 students is 14.4 years ten of them leave thereby diminishing the average of 14.2 years Find the average of those who leave?

- **15.2 Years**

22. A man spend 2500 per month for four months and runs into debts. he then reduces his expenses 1750 per month and just clears of his debts after eight months Find his income per month?

- **2000**

23. Saleem has three children the sum of weight of the two smallest children is 71 pounds, the sum of the two largest children is 96 pounds, and the sum of the weight of the smallest and the eldest is 87 pounds,What is the sum of the weight of all three children?

- **127 pounds**
